CALEB KARIUKI

PROFILE

Junior Software Developer specializing in modern web technologies including Angular, React, and Node.js. Proven ability to design and build full-stack applications such as inventory and expense management systems, with beginner experience incorporating Dynamics and other ERP-related business logic into software solutions. Gained practical industry experience at Systems Reengineered Ltd, contributing to the development of multiple enterprise-focused applications while maintaining a strong focus on usability and performance. Highly motivated to contribute to real-world projects and grow into a professional software engineer.

WORK EXPERIENCE

- Systems Reengineered** JUNE 2025 - AUGUST 2025
Junior System Developer Internship
 - In the role of Junior Systems Developer, I focused on building full-stack web applications and customizing ERP solutions, touching on Microsoft Dynamics NAV and Business Central. I worked with a team to enhance user interface design and improve system functionality by integrating modern web modules with core enterprise business logic. Through these efforts, I gained practical experience in software development and business process automation by contributing to real-world projects that streamlined complex workflows.

TECHNICAL SKILLS

- Frontend Development (Angular, React)
- Backend Development (Node.js)
- ERP Systems: Microsoft Dynamics NAV, Business Central, ERP Logic & Integration.
- Database Management: MySQL, PostgreSQL.
- Version Control (Git & GitHub)
- Web Application Deployment (Vercel, GitHub Pages)
